

# CBI Fall Symposium

**November 15, 2019**

Lynch Auditorium and Nobel Hall  
Dept. of Chemistry

9:30 AM | Welcome Breakfast (Outside Lynch)

10:00 AM | Manasvita Vashisth (Discher Lab)

Scaling analyses of tumor transcriptomes link Lamin-B to proliferation and poor survival while linking fibrosis to prolonged survival

10:25 AM | Samuel Keller (Lim Lab)

Regulation of spatio-temporal limits of developmental gene expression via enhancer grammar

10:50 AM | Coffee Break

11:00 AM | Prof. Eranthie Weerapana (Boston College)

Chemical-proteomic strategies to investigate cysteine reactivity

12:00 PM | Lunch provided (Nobel Hall)

1:00 PM | Jacque Faylo (Christianson Lab)

The role of oligomerization in substrate channeling and cooperativity of assembly-line terpenoid biosynthesis enzymes

1:25 PM | Prof. Nevan Krogan (UCSF)

Using Systems Approaches to Understand Disease

2:25 PM | Coffee Break

2:35 PM | Prof. Amy Palmer (CU Boulder)

Riboglow: a new platform for tracking RNA molecules in live mammalian cells

3:45 PM | Poster session with refreshments (Nobel Hall)

5:15 PM | Announcement of poster awards

**gapsa**  
GRADUATE and PROFESSIONAL STUDENT ASSEMBLY  
UNIVERSITY of PENNSYLVANIA
