

CBI Summer Retreat

Friday, July 24th, 9:00AM—1:30PM

Virtual symposium: Zoom

9:00 AM Quick Welcome

9:00 AM Professor Cynthia Wolberger (Johns Hopkins SOM)

Unmasking cross-talk between histone ubiquitination and methylation

10:00 AM Tom Lin (Post Doc. Megan Matthews)

Discovery of cofactor-derived covalencies using chemical proteomics

10:15 AM Kiara N. Berríos (5th year Rahul M. Kohli)

Tuning base editing efficiency and precision with hyperactive AID enzymes

10:30 AM Professor Alexis Komor (UCSD)

Investigating the Enzymatic and Cellular Mechanisms of Base Editing

11:30 AM Xuepeng Wei (Post Doc. Ronen Marmorstein)

Molecular basis of acetyl-CoA production by ATP-citrate lyase

11:45 AM Jean Etersque (3rd year Mark Sellmyer)

Engineering a PET reporter library for quantitative in vivo imaging

12:00 PM Professor Yael David (MSK)

Using new chemical Tools to uncover epigenetic events that drive oncogenesis

1:00 PM Wenchao Qian (3rd year Matt Good)

A spatial gradient of cell size Regulates genome activation and vertebrate early development

1:15 PM Trevor van Eeuwen (5th year Kenji Murakami)

"A Tale of Two Serines"

1:30 PM Closing Remarks <https://forms.gle/2odfJfPYQDcDy55W7>
