Friday, December 4, 2009
Biomedical Research Building, 421 Curie Blvd

8:00 a.m. Registration and Continental Breakfast (provided to registrants)
Lobby, Biomedical Research Building II/III, 421 Curie Boulevard

8:30 a.m. James A. Hoxie, M.D.
Professor of Medicine and Director of the Penn Center for AIDS Research
Welcome

8:45 – 9:10 a.m. Carrie Kovarik, M.D.
Assistant Professor of Dermatology, University of Pennsylvania
Using technology to improve the diagnosis of HIV-related disease in resource limited settings

9:10 – 9:35 a.m. Robert Gross, M.D., M.S.C.E.
Associate Professor of Medicine and Epidemiology, University of Pennsylvania
Getting to the HAART of antiretroviral treatment success and failure in Botswana

9:35 – 10:00 a.m. James L. Riley, Ph.D.
Research Associate Professor of Pathology and Laboratory Medicine, Pathology Cancer Biology, University of Pennsylvania
Building the bionic T cell to fight HIV-1 infection

10:00 – 10:15 a.m. Break

10:15 – 10:40 a.m. Kyong-Mi Chang, M.D.
Associate Professor of Medicine/Gastroenterology, University of Pennsylvania; Director, GI Hepatitis Clinic, Philadelphia Veteran’s Administration Medical Center
Mechanisms of T cell immune regulation in HCV infection

10:40 – 11:05 a.m. John B. Jemmott, III, Ph.D.
Kenneth B. Clark Professor of Communication, Department of Psychiatry, University of Pennsylvania
Integrating qualitative and quantitative methods in developing HIV prevention interventions: An example from South Africa

11:05 – 12:00 p.m. Kenneth H. Mayer, M.D.
Professor of Medicine and Community Health, Brown University
Prevention Science Core Director, Lifespan/Tufts/Brown Center for AIDS Research
Preparing for PrEP: Panacea or pandora’s box?

12:00 – 1:15 p.m. Lunch (provided to registrants)
Lobby, Biomedical Research Building II/III; Seating in Rooms 251 and 252

1:15 – 1:45 p.m. Philip R. Johnson, M.D.
Professor of Pediatrics; Chief Scientific Officer and Executive Vice President, The Children’s Hospital of Philadelphia
Roadblocks en route to an HIV vaccine: Bypassing the adaptive immune response

1:45—2:10 p.m. Michael Betts, Ph.D.
Assistant Professor of Microbiology, University of Pennsylvania
Kill or die: Cytolytic T cell function and dysfunction in HIV infection

2:10 – 2:35 p.m. Chip Tilton, M.D.
Postdoctoral Fellow of Microbiology, University of Pennsylvania
CCR5 antagonists, viral resistance, and implications for patients

2:35 to 3:30 p.m. Julie Overbaugh, Ph.D.
Member, Human Biology Division, Fred Hutchinson Cancer Research Center
Is there a role for neutralizing antibodies in protection from HIV infection? Lessons from studies of naturally infected populations

3:30 to 5:00 p.m. Poster Session and Reception, Lobby, Biomedical Research Building II/III

Agenda: http://www.uphs.upenn.edu/aids/retreat/index.html
