PHYSICIAN STRATEGIES FOR REDUCING OR DEALING WITH BURNOUT

Bibliography*

* This bibliography results from a search of the medical literature on PUBMED completed in late 2015 looking back through 2007. It includes articles found in the reference lists of articles considered. It also includes more recent articles that have come to my attention, including recently published research by Samantha Melzer-Brody and Jo Shapiro and their colleagues.

The search used keywords physician stress reduction, women physicians’ exhaustion, physician burnout and gender.
