

The Department of Chemistry
And the Department of Biochemistry & Biophysics
Jointly Present

2016 Chemical Biophysics Mini-Symposium

Friday, April 8, 2016

Lynch Auditorium, Chemistry Building

- 1:30 pm** **Marcel Bruchez**, Carnegie Mellon
Measuring and Controlling Biological Function with Genetically Targeted Dyes
- 2:20 pm** **Elizabeth Nolan**, MIT
Metals and Immunity: Bioinorganic Explorations of Human Host-defense Proteins
- 3:10 pm** **Coffee Break**
- 3:20 pm** **Korrie Mack**, Shorter Lab
Engineering Potentiated Hsp104 Variants with Enhanced Substrate-Specificity to Counter Neurodegeneration
- 3:50 pm** **Keynote: Erik Sorensen**, Princeton
Toward Nature-Inspired, Catalytic Hydrogen Atom Transfer Reactions
- 5:00 pm** **Reception, Nobel Hall**

Co-Sponsored by
