

NIDDK P30 Center for Molecular Studies in Digestive and Liver Diseases Research Seminar

Zoltan Pierre Arany, MD, PhD

Samuel Bellet Professor of Cardiology
Co-Director, Cardiovascular Division of Institute Diabetes Obesity & Metabolism
University of Pennsylvania

“Atypical Modulation of $mTOR$ to Suppress NAFLD/NASH”

**Thursday, November 10, 2022
12:00 – 1:00 PM EST
901 Biomedical Research Building**

The Arany lab focuses on cardiovascular metabolism. Such unfocused focus has led us to study a wide range of projects in the heart, liver, fat, and many other tissues, and has led us to use all techniques we can get our hands on, including human genetics, genetically engineered mouse models, cell culture, metabolomics, in vivo isotope metabolic tracing, and many more. In essence, the Arany lab aims to ask fundamental questions within the (wide) space of cardiovascular metabolism, and leverages all available state-of-the-art approaches to do so.

The meeting will start promptly at 12:00 pm. Please be on time.
