University of Pennsylvania Perelman School of Medicine

"The Role of Menin in Colonic Polyposis and Carcinogenesis"

Thursday, April 13, 2023

12:00 – 1:00 PM EST

901 Biomedical Research Building or [Via Zoom](#)

Our lab and research program are focused on gastrointestinal cancer and hereditary gastrointestinal cancer predisposition syndromes, where we utilize a combination of basic science, translation studies, and clinical studies, in addition to extensive collaboration, to pursue multiple lines of active investigation.

We have ongoing active research projects in the following areas: Colorectal cancer, Lynch syndrome, Colonic polyposis, Gastric cancer, and Pancreatic cancer.
