### OVERVIEW

Beginning in December, the Brodesser Cancer Center at Cape Regional will have access to the most advanced radiation therapy options available, including advanced technology, clinical trials and Penn radiation oncologists. This presents a unique opportunity, for an educational activity to provide a review of the latest advances in cancer treatment options including surgical techniques, radiation and systemic therapies, to the Cape Regional community. Activity format will provide opportunity for interaction with expert faculty and other attendees with the aim of implementing new standards of patient care. Participants will leave with up-to-date, practical information with immediate clinical application.

### OBJECTIVES

At the completion of this course, participants should be able to:

- Describe new advances in cancer treatment including: radiation therapy, precision surgery, targeted therapy and immunotherapy.
- Identify the essential role of the primary care physician as an initial point of contact and referral for cancer patients.

### WHO SHOULD ATTEND

This conference is designed for radiation oncologists, oncologic surgeons, medical oncologists, primary care physicians, and other healthcare professionals involved in the treatment of patients with cancer.
