Dr. Luigi Ferrucci is a geriatrician and an epidemiologist who conducts research on the causal pathways leading to progressive physical and cognitive decline in older persons.

His current positions include Senior Investigator, NIA Scientific Director, and Chief of the Longitudinal Studies Section at the National Institute on Aging.

Dr. Ferrucci is receiving this award for his paper, “Gene expression markers of age-related inflammation in two human cohorts,” published in *Experimental Gerontology* in 2015.
