

**RUTGERS**  
THE STATE UNIVERSITY  
OF NEW JERSEY

Brain Health Institute  
Department of Otolaryngology

## **Job Postings at the Yao Laboratory**

October 2022

The [Yao Laboratory](#) at Rutgers University has open positions at all levels! We are a part of the [Department of Otolaryngology](#) and a core member of the [Brain Health Institute](#). We employ a multi-disciplinary approach to study the neural circuit mechanisms of auditory and multisensory decision-making, including psychophysics, neural circuit manipulations, awake-behaving neurophysiology, and computational approaches. Our overall goal is to understand how the brain integrates sensory information to guide decision-making and reveal the neural mechanisms that link sensory deficits with cognitive impairments.

### **Open Positions**

Guaranteed funding for positions at the technician, graduate, postdoctoral, and staff scientist level is currently available. All team members will be part of a highly supportive and diverse research environment with excellent career development opportunities. Further details can be found on our webpage at: <https://www.yaolaboratory.com/open-positions.html>

Rutgers is located at the center of the Northeast corridor, with access to New York, Philadelphia, and the New Jersey shore within an hour. The region is home to world-class universities, numerous pharmaceutical and biotech research facilities, and corporate headquarters. Central New Jersey offers vibrant and diverse cultural activities, excellent public and private schools, and opportunities to live in urban, suburban, or small town settings within a short distance of campus.

Interested candidates should email Dr. Justin Yao ([justin.yao@rutgers.edu](mailto:justin.yao@rutgers.edu)) a brief statement of interest, CV, and contact information of 2-3 references.
