BIOM 6100 - Foundations in Statistics

Fall 2023

Course Co-Directors:
Daniel Beiting, Ph.D.
Assistant Professor of Pathobiology
School of Veterinary Medicine
Rm 314 Hill Pavilion 380 S. University Avenue
Phone: 215-898-9247
Email: beiting@upenn.edu

Russell Takeshi Shinohara, Ph.D.
Associate Professor of Biostatistics in Biostatistics and Epidemiology
Center for Clinical Epidemiology and Biostatistics Department of Biostatistics, Epidemiology and Informatics
Perelman School of Medicine
217 Blockley Hall 423 Guardian Drive
Phone: 215-746-1090
Email: russell.shinohara@pennmedicine.upenn.edu

Course Description:
Technological advances have transformed biomedical research, making the generation of complex and high-dimensional datasets routine, and underscoring the importance of robust statistical methods for data analyses. In this course, students will learn to use the open-source R programming language to explore foundational topics in statistics, including regression, hypothesis testing, survival analysis, inference, and handling missing data. The course will be virtual and asynchronous (self-paced) and will leverage online resources, including DataCamp.com.

Laptop required. Students will be evaluated based on completion of video lectures and online assignments.

Enrollment is expected to be 50-80 students

This course should be taken by 2nd year PhD students from CAMB, IGG, PGG.
