GENERAL ANNOUNCEMENTS

COVID-19 Testing and Vaccinations

Testing. Graduate students who live on campus or come to campus each week must be tested. You may enroll in [Penn Cares Testing](#) or in [COVID SAFE](#) – but you should not be enrolled in both simultaneously. If you are working in a lab in CHOP, Wistar, or another affiliate and are NOT entering Penn/PSOM buildings, you should follow those entities' testing protocols and do NOT need to enroll in University testing.

Red PennOpen Pass? If you signed up for Penn Cares testing but are not scheduled for a weekly test, you may get a red PennOpen pass. You will need to schedule your weekly test in order to be given a green pass. If you are no longer coming to campus weekly or have switched to COVID SAFE, please email Judy Jackson, jajackso@penmedicine.upenn.edu to arrange to be un-enrolled from Penn Cares. Please refer to Perelman School of Medicine email of 1/25/21 4:24pm for more details about testing.

Vaccinations. Penn does not yet have a general scheduling process for vaccinations. Medical students are being scheduled for vaccinations through UPHS. PhD students who work in labs connected to clinical facilities, such as CHOP, VET, or UPHS, **may** be scheduled for vaccinations through those entities. Students who are working SARS-CoV-2 in BSL3 labs or processing specimens from COVID patients may be prioritized for vaccination through Penn Medicine regardless of lab location (contact your PI and/or departmental BA, or Judy Jackson in BGS if in a non-PSOM lab). Subsequent prioritization groups will follow state guidelines and will occur as quickly as possible, depending upon availability of vaccine doses, which remains fluid and difficult to predict. We will continue to share updates as we receive them from our University and Health System colleagues. We ask that our students be patient and understanding as we navigate this process as a community. The institutions are doing their best to vaccinate the exposed and vulnerable first. Ultimately, we want to vaccinate everyone, so [if you are offered the opportunity to get vaccinated and want to do so, we ask that you get vaccinated](#). Every individual who is vaccinated is one less person who can spread the disease. This will allow more efficient distribution to the whole community if we don't have to circle back for people who deferred. We thank you for all your efforts to keep our community safe during these challenging times.

Prism & MATLAB Licenses

BGS students may obtain one year licenses for Prism free of charge. The sign-up form for Prism is included below. Note that the **form is due by March 31st, 2021**. Information on obtaining MATLAB licenses is also provided below.

1) **PRISM** LICENSES

These are arranged through BGS. The new license year begins May 1st. **Please note that even if you already have a Prism license you need to sign up again.**

If you are interested in obtaining a Prism license, please complete this Google form by March 31st: <https://forms.gle/1bGW24ZKXE3exjDeA>

Note that BGS offers Prism particularly for its graphing capabilities. With respect to statistical applications, we remind students of the importance of understanding the fundamental properties of any statistical analyses that they undertake. In addition, principles of reproducible research require all analyses to be carefully documented. This involves storing the data in an accessible form and creating a written record so that another researcher can easily replicate the statistical analyses for a particular set of data.

2) **MATLAB** LICENSES

These are arranged through Penn's Office of Software Licensing (OSL). You should email licenses@upenn.edu using your Penn email address and include the following information: HostID, operating system, and computer user name. See the following [instructions](#) for help locating this information.

Please note that the current MATLAB license expires **August 31, 2021** and you will need to contact OSL again at that time in order to renew.

- Students with limited access to internet or necessary technology for remote participation
- Students unable to participate in required synchronous sessions (due to time zone differences, etc.)
