

Biomedical Image Computing and Informatics Seminar

“Neuroimaging in aging and cognitive decline ”

Ilya Nasrallah, MD PhD
Assistant Professor
Radiology
University of Pennsylvania

Smilow Rubenstein Auditorium & Commons

3400 Civic Center Blvd.

Thursday, March 21, 2019 at 1pm

****Pizza lunch at 12:45pm****

Abstract

As the brain ages, several processes contribute to cognitive change, with pathologies including cerebrovascular disease and neurodegeneration. We will discuss efforts to measure these processes using large MRI cohort studies and PET neuroimaging.

Bio

Dr. Nasrallah is an Assistant Professor of Radiology, specializing in Neuroradiology and Nuclear Medicine. His research interests are in neurodegeneration and aging of the brain using multimodality imaging
