Standard Operating Procedure	CHOP Protocols Needing EKG and ECHO Interpretation	Page 1 of 1

INTRODUCTION: The Center for Human Phenomic Science (CHPS) accommodates studies from the Children’s Hospital of Philadelphia (CHOP) requesting electrocardiogram (EKG) and echocardiogram (ECHO) interpretation.

PURPOSE: To provide guidelines for proper steps so that CHOP EKGs and ECHOs are interpreted in a timely manner.

SCOPE: CHPS Leadership

PROCEDURE:

If a CHOP study requests EKG or ECHO interpretation from CHPS, the specific requests are discussed at CHPS Staff Meetings which are held twice/month. If we cannot accommodate, CHPS administration advises the study team on alternative ways to have their tests interpreted.

Supersedes: CHOP Protocols Needing EKG and ECHO Interpretation, 11/2017, 11/ 2021
