Dror Ben-Zeev, Ph.D.
Assistant Professor of Psychiatry
Department of Psychiatry, The Geisel School of Medicine at Dartmouth

Development, Evaluation, and Implementation of Technology-based Interventions for People with Serious Mental Illness

Monday, December 1, 2014
Time: 2:00pm-3:30pm
Houston Hall | Bodek Lounge, Room 100 | 3417 Spruce Street

Dr. Dror Ben-Zeev is an Assistant Professor in the Department of Psychiatry at the Geisel School of Medicine at Dartmouth College and a licensed Clinical Psychologist. He leads a program of research focusing on the use of Mobile Health (mHealth) approaches in the study, assessment and treatment of individuals with serious mental illness, integration of effective health technologies in systems of mental health care, and development of psychosocial interventions for psychosis. Dr. Ben-Zeev’s group is actively developing and testing several smartphone applications for self-management of schizophrenia, multi-modal sensing systems for detection of predictors of psychotic relapse, mobile platforms for assessment of violence and suicidality in patients with psychiatric illnesses and co-occurring substance use disorders, and training of “mobile interventionists” that leverage mobile technologies for real-time/real-place service provision in outpatient and inpatient clinical settings. In 2013, Dr. Ben-Zeev received a EUREKA grant award from the National Institute of Mental Health designed to support innovative and high-risk/high-reward research.
