

Name: Murray Grossman, M.D., Ed.D.

Contact: [mgrossma@mail.med.upenn.edu](mailto:mgrossma@mail.med.upenn.edu)

Clinical Specialty: Neurology

Research Interests:

The Grossman Lab investigates markers of disease in patients with focal neurodegenerative conditions such as front temporal degeneration, Alzheimer's disease, corticobasal syndrome, Lewy body disease and amyotrophic lateral sclerosis. We study measures of language, executive and social processing, we relate these to several measures of brain structure and function using MRI, and to genetic, plasma and cerebrospinal fluid biomarkers of disease. Patients are followed longitudinally, and we relate disease markers obtained during life to findings at autopsy.
