Penn Medicine

Data Analytics Center Reporting Team

WHAT IS IT

The Data Analytics Reporting Team is responsible for providing access to the enterprise's clinical information. On average, we complete over 2,000 report requests a year, developing both ad hoc and automated recurring reports that leverage information from Penn Data Store, NaviCare, HPM, and Epic.

OUR GOAL

The reports we develop provide clinical and business intelligence to facilitate research, quality improvement, compliance, performance measurement, operational workflows, strategic support, billing, and patient care. Our team prides itself on working one-on-one with our clients to ensure the delivery meets their needs – from a data field standpoint as well as a delivery mechanism.

WHAT WE DO

+ The DAC Reporting Team resolves difficulties in data acquisition.
+ Eases the administrative burden on all data consumers.
+ Creates time efficiency so that care givers may focus on improving healthcare rather than gathering data.

THE REPORTING TEAM CURRENTLY PROVIDES DATA THAT FALLS UNDER THE FOLLOWING BASIC CATEGORIES:

›› Admission Data
›› Allergies
›› Blood Bank
›› Coded Diagnosis
›› Coded Procedures
›› Discharge Data
›› DRGs
›› ED & OR Visit Details
›› Hospital Acquired Infections
›› Immunizations
›› Inpatient Visit Details
›› Lab Results
›› Medical History
›› Medication Administrations
›› Microbiology
›› Outpatient Visit Details
›› Patient Demographics
›› Patient Flow Information
›› Pathology
›› Patient Registration
›› Professional Billing
›› Revenue
›› Scheduling
›› Transfer Data
›› Vital Signs
