

Vertical spacing between text objects as well as font sizes are indicated on each plaque. All *italic* text is done with the font "Avenir Black" All Bold text is done with the font "Avenir Black" All Bold text is done with the font "Avenir Black" All Bold text is done with the font "Avenir Black" All Bold text is done with the font "Avenir Black" All Bold text is done with the font "Avenir Black" All Bold text is done with the font "Avenir Black" All Bold text is done with the font "Avenir Black" All Bold text is done with the font "Avenir Black" All Bold text is done with the font "Avenir Black" All Bold text is done with the font "Avenir Black" All Bold text is done with the font "Avenir Black" All Bold text is done with the font "Avenir Black" All Bold text is done with the font "Avenir Black" All Bold text is done with the font "Avenir Black" All Bold text is done with the font "Avenir Black" All Bold text is done with the font "Avenir Black" All Bold text is done with the font "Avenir Black" All Bold text is done with the font "Avenir Black" All Bold text is done with the font "Avenir Black" All Bold text is done with the font "Avenir Black" All Bold text is done with the font "Avenir Black" All Bold text is done with the font "Avenir Black" All Bold text is done with the font "Avenir Black" All Bold text is done with the font "Avenir Black" All Bold text is done with the font "Avenir Black" All Bold text is done with text

The plaque copy will be centered around the Penn shield and the text will not expand above the top line of the shield. However, if the copy does drift pass the shield line, this is an indicator of "too much copy" which is a PMDAR issue, and a decision will be made to either correct the alignment by limiting the copy or accept the copy drifting above the shield line as an exception to the rule.
