

What is the CRIC study?

- A research network of 7 cities in the US enrolling and following patients with CKD in an observational study to learn more about why CKD progresses, and why there is such a high CVD occurrence in people with CKD

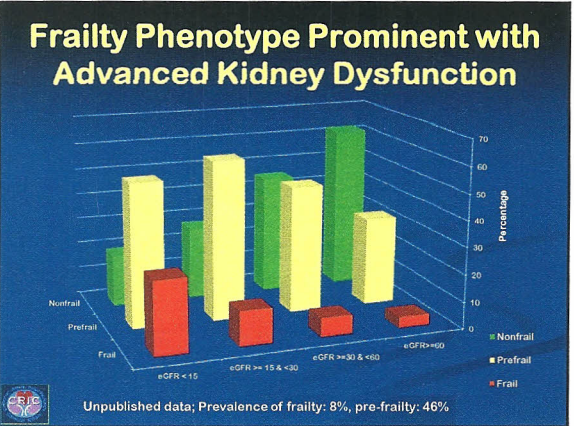

Recruitment Criteria: eGFR and Proteinuria

Dipstick Protein

eGFR, mL/min/1.73m ²	Negative / <1+	≥ 1+	Target:
45-60	25%	75%	(65% of 1500 new recruits)
61-70	0%	100%	(35% of 1500 new recruits)

Who are we NOT looking for?

- NYHA III and IV heart failure (poor survival)
- Previously on dialysis > 1 month (endpoint)
- Patients with non-skin cancer (poor survival)
- On immunosuppression for kidney disease
- Older than 79 years

We provide

- Transportation coverage (taxi, SEPTA, parking)
- We send results to providers
- We provide a modest stipend for attending
- Visits are once a year (in – person) and take a few hours (CRC at Penn)
