

A CASI Nand & Jeet Khemka Distinguished Lecture

Building Global Health Research from India for the World

**Thursday,
September 26, 2024**

*Penn Museum
3260 South Street
Philadelphia, PA 19104*

*Lecture (Widener Lecture Hall): 4:30-6:00pm
Reception (The Sphinx Gallery): 6:00-7:00pm*

Dr. Gagandeep Kang

*Director,
Enteric & Diarrheal Diseases, Diagnostics,
and Genomics, Epidemiology, & Modeling,
Global Health,
Bill & Melinda Gates Foundation*

Dr. Gagandeep (Cherry) Kang leads the newly formed team at the Gates Foundation and executes against its three strategic focus areas: Enteric & Diarrheal Diseases, Diagnostics, and Genomics, Epidemiology, & Modeling. Previously, in addition to serving on the Foundation's Scientific Advisory Committee, Cherry has been a Professor in the Division of Gastrointestinal Sciences, Christian Medical College (CMC) in Vellore, India. She is a physician scientist, working on vaccines and public health, particularly focused on children and enteric infectious disease in India. Her research ranges from water and sanitation to vaccines and nutrition, and her team is one of the strongest multidisciplinary research groups in India.

Panelists (Perelman School of Medicine, University of Pennsylvania):

Dr. Glen N. Gaulton
*PSOM Vice Dean and Director,
