# Penn Radiology Global Health Imaging Case Competition

The Global Health Imaging Case Report Competition is a collaboration between the Departments of Radiology at Penn Medicine and Children's Hospital of Philadelphia (CHOP), along with the Perelman School of Medicine Center for Global Health. It was designed for medical trainees in low- and middle-income countries to present cases unique to their region. The free virtual webinar event features presentations by the finalists, and a keynote speaker.

January 19th , 2024 9:00 PM EST

Case Competition Focus: Asia & Oceania

Keynote Speaker: Dr. Mingmar Sherpa

Dr. Mingmar Sherpa was born and raised in Phaplu, Solokhumbu, in the foothills of Mt. Everest. Unlike his Sherpa peers who took up climbing with ambitions of scaling Everest, Dr. Mingmar spent his time reading. He was the first physician in the Sherpa community. He served his community for several years as a rural physician. He spent some time in Kathmandu when he led the Ministry of Health. His heart, however, was always in rural Nepal.

After retirement, he learned point-of-care ultrasound which he taught to nurses and midwives to spot high-risk pregnancies and divert such patients to more advanced obstetric care than is available in remote areas. His efforts have substantially reduced maternal mortality, particularly in Western Nepal. His endeavor is the finest case study of "imaging saves lives."

Why Participate?

This event provides a platform for networking, professional advancement, and learning while having fun (and potentially winning prize money).

Cash Prizes

1st Place - $1000
2nd Place - $500
3rd Place - $250
People's Choice - $250
