Provider Background

In support of improving patient care, Penn Medicine is jointly accredited by the Accreditation Council for Continuing Medical Education (ACCME), the Accreditation Council for Pharmacy Education (ACPE), and the American Nurses Credentialing Center (ANCC), to provide continuing education for the healthcare team. The CME program at Penn Medicine is administered by Office of Continuing Medical and Interprofessional Education office. The professional continuing education of physicians has always been an important part of the institution's missions in education, research and patient care.

All presentations provided as part of our certified educational activities are peer-reviewed to ensure that all content is valid, unbiased, scientifically sound, and that all clinical recommendations are based on the best evidence available. We aim for the highest levels of evaluations available to include measurements of outcomes at the levels that go beyond capturing just participants' reaction and whether the learning occurred and concentrating on behavioral changes and achievement of results that will result in patient care improvements.

Overview

This hands-on course is designed to provide information through cadaver dissection and individualized preceptorship to master advanced radical pelvic and high yield gynecologic oncology procedures including (but not limited to) radical hysterectomy, pelvic exenteration, inguinal dissection, pelvic, paraaortic and higher order lymph node dissection, vascular injuries, and upper abdominal procedures.

Objectives

At the completion of this course, participants should be able to:

- Develop deeper understanding of the upper abdominal, pelvic, and inguinal surgical anatomy
- Describe the critical steps in performing advanced radical pelvic and high yield gynecologic oncology procedures
- Describe trips, pitfalls, and strategies to approach complex gynecologic cases

Who Should Attend

This course is designed for gynecologic oncology fellows in-training and practicing gynecologic oncologists.
