

Needed: Research Lab Manager and Head of Basic Science for the Hill Lab at the Children's Hospital of Philadelphia and University of Pennsylvania

Study the immune causes of **Pediatric Allergy** and **Obesity** at one of the best employers in the country! The laboratory of Dr. David Hill at the Children's Hospital of Philadelphia and University of Pennsylvania is seeking experienced, high-caliber candidates for the position of Laboratory Manager. This individual will work closely with Dr. Hill to maintain normal laboratory operations, manage research personnel and projects, and advance the overall goals of the research program.

Specific Responsibilities:

- Ensure the laboratory is stocked with general use supplies and reagents.
- Order, receive, and ensure appropriate storage of supplies and reagents.
- Handle purchase orders and invoices.
- Maintain exceptional laboratory organization and adherence to standard operating procedures.
- Oversee laboratory safety assessments.
- On and off-board personnel.
- Proof-read scientific manuscripts and grants.
- Assist with modifications of IRB, IACUC, IBC research protocols.
- Perform qPCR and mouse line genotyping, and assist with other experiments, as needed.
- Organize social events for the lab and maintain lab social media accounts.

Minimum Qualifications:

- Bachelor's degree in the biomedical sciences *and* 3-5 years of relevant wet lab experience in molecular, cellular, and/or immunobiology.
- Exceptional interpersonal skills.
- Detail oriented and highly organized work habits.
- Experience in laboratory management preferred, though experienced scientists who seek to expand their skills into management will be considered.

Housed within the Division of Allergy and Immunology at the Children's Hospital of Philadelphia, the Hill Lab is an international leader in pediatric allergy and obesity research. We perform cutting edge studies using patient samples and animal models that advance our understanding and treatment of these highly prevalent diseases. The Hill Lab is committed to fostering an inclusive and diverse research environment. We are looking for a passionate and dedicated individual to help lead our innovative team.
