1.15.2019
Jonah Sacha, PhD
Associate Professor
VGTI-Vaccine and Gene Therapy Institute
Oregon Health and Sciences University
“Novel nonhuman primate models for HIV vaccine development and cure”

1.22.2019
Andrea Schietinger, PhD
Assistant Member
Immunology Program
Memorial Sloan Kettering Institute
“Tumor-specific T cell differentiation and dysfunction”

1.29.2019
Andy Minn, MD, PhD
Associate Professor
Radiation Oncology
University of Pennsylvania
“Opposing Roles of Interferon and Pattern Recognition Receptor Signaling in Cancer Immunotherapy”

2.5.2019
Aaron Ring, MD, PhD
Assistant Professor
Department of Immunology
Yale School of Medicine
“The Immune System on Drugs”

2.12.2019
Sebastian Amigorena, PhD
CNRS Research Director
Curie Institute
“Epigenetic control of CD8+ anti-tumor T cell responses”

2.19.2019
Frederic Geissmann, MD, PhD
William E Snee Chair of Immunology
Memorial Sloan Kettering Cancer Center
“Brain Bone and Fat: development and diseases of macrophages”

2.26.2019
Avery August, PhD
HHMI Professor and Professor of Immunology
Cornell University College of Veterinary Medicine
“Tuning T cell responses”

3.5.2019
Sunny Shin, PhD
Associate Professor of Microbiology
University of Pennsylvania
“Innate immune defense against intracellular bacterial pathogens.”

3.12.2019
Jennifer Martinez, PhD
Investigator
Immunity, Inflammation, and Disease Laboratory/Inflammation and Autoimmunity Group
NIH/NIEHS
“Crossing the Rubicon: Non-canonical autophagy mediates the inflammatory response”

3.19.2019
Virginia Shapiro, PhD
Professor of Immunology
Mayo Clinic
“Regulation of T cell development by HDAC3”

3.26.2019
David Artis, PhD
Michael Kors Professor of Immunology
Weill Cornell Medicine
“Regulation of immunity and inflammation”

4.2.2019
Michela Muller-Trutwin, PhD
Member: Head of Structure
HIV, Inflammation and Persistence
Institut Pasteur
“What can natural hosts of SIV teach us about NK cell responses”

4.9.2019
David Masopust, PhD
Professor
Department of Microbiology and Immunology
University of Minnesota
“Resident Memory T Cell Function and Differentiation”

4.16.2019
Jonathan Kipnis, PhD
Harrison Distinguished Teaching Professor and Chair
Department of Neuroscience
University of Virginia School of Medicine
“Meningeal immunity and lymphatics in brain function and dysfunction”

4.30.2019
Elina Zuniga, PhD
Professor
Department of Molecular Biology
UC San Diego
“Adaptations During Long-Term (Host-Pathogen) Relationship”

5.7.2019
Stephanie Eisenbarth, MD, PhD
Associate Professor
Biological & Biomedical Sciences
Yale University
“A specialized Tfh cell drives anaphylactic IgE”

5.14.2019
Anjana Rao, PhD
Professor, Division of Signaling and Gene Expression
Pfizer Endowed Chair in Cancer Immunology and Oncology
La Jolla Institute
“TET methylcytosine oxidases in immune responses and cancer”

5.21.2019
John O’Shea, MD
Senior Investigator
Molecular Immunology and Inflammation Branch
NIH/NIAMS
“Genomic Views of Lymphocytes”
Refreshments served at 3:30 p.m. • All Are Welcome
If you wish to meet with any of the speakers contact:
Maria Puciata • 215-746-3357 • Email: ifiadmin@pennmedicine.upenn.edu
