

**April 29, 2025**

Dear Anthony Young:

It is with great pleasure that we inform you of being selected as a recipient of the Alavi–Mandell Award for your publication entitled, **“Kinetic Analysis and Metabolism of Poly(Adenosine Diphosphate–Ribose) Polymerase-1–Targeted  $^{18}\text{F}$ -Fluorothantrate PET in Breast Cancer”**.

The Alavi-Mandell award was established by our families to honor their fathers, who valued education immensely. The award is given to individuals who were the first author of a paper published in the *JNM*, were trainees at the time the published work was carried out, and made a major contribution to the completion of the work.

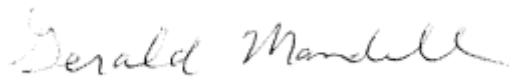

Our aim is to encourage young physicians and scientists to pursue a career in academic and research in nuclear medicine.

Best wishes for a very successful and fulfilling research career.

Sincerely,

Abass Alavi, MD  
Professor of Radiology & Director  
Research Education  
University Hospital of Pennsylvania

Gerald Mandell, MD
