BERKMAN SUMMER INTERNSHIP IN PALLIATIVE CARE

STARTING JUNE 2023

For rising MS2 students with backgrounds underrepresented or historically excluded from medicine

There is an urgent need to diversify the fields of Hospice and Palliative Medicine, as they grow to meet the demands of an aging and increasingly seriously ill population. **We cannot build a more diverse workforce simply by wishing for it**; we need to actively contribute by creating a pipeline into careers in Hospice and Palliative Medicine.

Penn Medicine Palliative Care Program
