

Sarnoff Cardiovascular Research Foundation Fellowship Program

*Inspiring the
Physician-Scientists
of Tomorrow*

2024-25 Medical Student
Research Fellowship Award

Applications Due January 10, 2024

The mission of the Sarnoff Cardiovascular Research Foundation is to develop medical students throughout their careers into the next generation of leaders in cardiovascular innovation, research, and medicine by providing mentored research experiences and lifelong involvement in a safe and supportive community committed to diversity and inclusion.

The Sarnoff Fellowship Program offers medical students enrolled in accredited U.S. medical schools the opportunity to spend a year conducting intensive work in a biomedical research facility in the United States. Although applicants may have prior research experience, applications are also encouraged from students without extensive prior research experience.

Fellows are selected on the basis of a national competition. Sarnoff seeks individuals with demonstrated intellectual and academic achievement, as well as leadership ability. Applicants enrolled in an MD/PhD program will not be eligible for a Sarnoff Fellowship.

Applications are encouraged from second and third year medical students. Fourth year medical students are required to submit an official letter from their medical schools granting graduation deferment.

There are no citizenship requirements for application, but those who are not U.S. citizens must have and maintain an appropriate visa. The Foundation will not handle visa matters for applicants.

The Sarnoff Foundation is committed to promoting diversity in the biomedical and scientific community. We strongly encourage applicants from members of underrepresented or historically disadvantaged backgrounds.

Each applicant must submit the following:

- An up to two page essay (1/2 inch margins and Arial 11 font) summarizing a question you find interesting related to cardiovascular disease. How might you go about answering that question through scientific research? This should be an idea you generated through your experience in medical school and review of the literature, not a project you have worked on in the past. Also, the text should be developed by the applicant independent of direct input from a mentor.
- A half page describing your motivation to pursue a year of dedicated research in cardiovascular disease.
- Completed application form and signed statement of confidentiality
- Official medical school transcript
- Curriculum vitae
- Recommendation from the applicant's Sponsor
- Two additional recommendations
- Any other material that the applicant determines is appropriate to support the application

To Apply visit:

www.SarnoffFellowship.com

online application available in July 2023

Annual Stipend: \$42,000

Mentorship through Sarnoff

The cornerstone of the Sarnoff Fellowship is the special interaction between the medical students and the laboratory Preceptor with scientific and mentoring expertise. This close relationship, developed during the course of the Fellowship, and continuing throughout the Fellow's career, is enhanced by additional interactions with the Sarnoff Scientific Committee and Sarnoff Alumni. These experiences cultivate a life-long appreciation and enthusiasm for cardiovascular investigation, leading many to choose a career in cardiovascular research. The Foundation's investment in the Sarnoff Fellow is life-long.

Allowances up to \$8,000 for travel support to select a Preceptor and Fellowship laboratory and attend the Sarnoff Annual Scientific Meeting and American Heart Association Scientific Sessions, moving expenses, health insurance and funds for travel to present a paper at two national conferences

Application Deadline: January 10, 2024

No extensions or exceptions will be made for these deadlines
