FINANCIAL SUPPORT Stipend provided

APPLICATION DETAILS + MORE INFO

Please visit our site or contact the
program administrator (listed below)

The program is available to 2 medical students
per year, at any point during training, and will
extend graduation date by one year.

The USC Caruso Department of Otolaryngology–Head and Neck Surgery clinician-scientist training program (CSTP)

is a 9–12-month research track offering medical students the opportunity to be involved in meaningful research experiences with close mentorship by world-class faculty researchers. This program is funded by an NIH R25 grant.

- Spearhead your own research project that will help patients by discovering cures for disease
- Gain experience in working with cutting-edge experimental techniques
- Develop close mentoring relationships with research faculty
- Participate in structured didactics, seminars, conferences, and journal clubs
- Jumpstart your career in academic medicine by having a dedicated research experience

We are committed to training future generations of clinician-scientists from underrepresented backgrounds. Our CSTP will provide the scientific resources, mentorship, educational environment, and institutional support required to execute this charge. Students from underrepresented groups as defined by the [NIH](#) are strongly encouraged to apply.
