

What is OncoLink?

- The web's first cancer education site.
- Founded in 1994.
- OncoLink provides tools and educational materials to support the practice of busy practitioners.

Our Team

This award-winning site is maintained by a group of oncology healthcare professionals who understand the needs of patients, caregivers and healthcare professionals.

OncoLink's content is continually updated and ranges from treatment and disease information for a newly diagnosed patient, support through the side effects of treatment, and into survivorship.

Tools for Healthcare Professionals

Newly Diagnosed

- Articles and patient resources on navigating a new diagnosis, second opinions, and preparing for healthcare visits.
- Printable forms that can be filled in to track treatments, medications, test results and appointments.

On Treatment

- Build a patient centered binder of evidenced based educational materials with just a few clicks.
- Handouts focus on disease type, treatment, side effect management and medications.

Medication Teaching

- Up to date information on currently used cancer medications.
- Teaching sheets are written in patient accessible language.
- Includes information about side effect management, access to medications, insurance coverage and potential sources of financial assistance.

- Includes handouts on cancer related practical, emotional, spiritual and physical concerns.
- Focuses on psychoeducation and self management strategies.

Cancer Survivorship

- Allows for quick creation (avg. time 4 minutes) of a survivorship care plan.
- Provides long term management guidelines for health and wellness, follow-up care, late effects of treatment and adjusting to life after cancer.

Newsletters

- Publishes quarterly newsletter, O-Pro, for oncology professionals.
- E-News is a monthly publication for patients and caregivers containing information about website updates, cancer education opportunities and timely and relevant news you can use.
