

# Mothers **MATTER**

MEDICATION ASSISTED TREATMENT FOR ENGAGEMENT AND RESILIENCE

For pregnant women with opioid dependence, Mothers MATTER offers outpatient office-based buprenorphine treatment in an integrated setting, with routine obstetric services and prenatal care.

## PERINATAL CENTERS OF EXCELLENCE

ARE CREATED FOR PREGNANT/POSTPARTUM WOMEN

- with an opioid use disorder
- using opioids for chronic pain management
- and those women needing support navigating their obstetrical care in the face of ANY substance use disorder

### SERVICES OFFERED INCLUDE

- Compassionate and non-judgmental comprehensive care management
- Complete psychiatric and behavioral health assessment
- Care coordination between your obstetrical providers, behavioral mental health team, social workers, addiction specialists and neonatologists
- Community based patient advocates offering: home visits, transportation assistance, emotional support, coordination of addiction services (if desired), labor and lactation support
- Help preparing both physically and emotionally for “bringing home your baby”
- Education and support for those mothers whose newborns will have an extended hospital stay
