

Preparation of protein A/G beads:

1. Take out 5ml Glutathione sepharose beads from stock into 50ml centrifuge tube.
2. Add 35ml RIPA buffer and mix, then spin 5mins with 2000rpm at 4°C.
3. Wash 3 times with RIPA buffer.
4. Add 15ml RIPA buffer supplement with proteinase inhibitors and stock in 4°C.

*Note: For preparation protein A&G beads, the initial protein A and G beads are used according to 2:1 proportion.
