

Other Technologies

Keyboards and Mice: Wireless keyboard and mouse for using with laptops or fixed in space computers. These devices can be ordered or may come with select rooms based off of rooms installed technology. A wired mouse is available with all laptops and can be found in the laptop bag if not already set up.

Laptop Speakers: Wired laptop speakers for conference rooms that don't have program audio built into the rooms systems. These work with laptops or fixed in space computers. These speakers support up to 10 watts of sound and are suitable for meetings of 25 people or less.

Laser Pointers: Presentation pointers in the color green or red are available in many locations or can be ordered for use in a space that doesn't have one.

Power Strips: 5 foot / 25 outlet power strips are available upon request. These power strips are commonly used in classes where students actively bring laptops for class participation.

Slide Advancers:

Jade Remote (Rooms w/ LCD Projector) a wireless remote with a range of 100 feet and has a high power green laser pointer and wireless mouse controller built in. These advancers are compatible with Mac or PC computers and with PDF's, PowerPoints and Keynote applications.

Logitech Spotlight (Rooms w/ Flat Screen Monitor) a presentation remote with advanced pointer that uses the computers mouse cursor to point. The cursor can be adjusted to a small green dot that simulates a laser pointer. These advancers are compatible with Mac or PC computers and with PDF's, PowerPoints and Keynote applications.
