

November 2025

Thalheimer Center for Cardio-Oncology Patient Symposium 2026:

Caring for Your Heart through Your Cancer Journey

Wednesday, May 20th, 2026

In Person in the Rubenstein Auditorium

Smilow Center for Translational Research

3400 Civic Center Boulevard

Philadelphia, PA 19104

On behalf of the Thalheimer Center for Cardio-Oncology and the Abramson Cancer Center of the University of Pennsylvania, we officially invite you to exhibit at the 2026 Cardio-Oncology Educational Patient Symposium. The meeting is scheduled to take place on Wednesday, May 20th, 2026, 8:00 am to 1:00 pm EST.

The educational meeting will be separate from the exhibit hall.

The cost to exhibit is \$2,500.

In Person Only Exhibit Table

- One (1) exhibit table at the venue.
- Registration for two (2) representatives to attend all conference sessions and meals in person.
- Company listing in the conference materials (printed and digital).

In-Person Exhibitor Display Information:
• Exhibitors are responsible for supplies, set-up, takedown, delivery and any additional costs related to your display. • You will be provided with a skirted table and access to electrical outlets.

Overview:

The purpose of this patient-centered symposium is to provide our patients at the Abramson Cancer Center with actionable knowledge relevant to their cardiovascular health as they navigate their cancer journey.

Objectives:

- To share current knowledge about how cancer and cancer therapies can affect one's heart.
- To share strategies to improve heart health prior to, during, and after cancer therapy.
- To share our ongoing clinical research in cardio-oncology and how our findings may inform the future of cardio-oncology care.
- To bring together our Thalheimer Center for Cardio-Oncology community and thank our patients for their trust in our care and for participation in our research programs.

Patient Learning Objectives:

- To learn about the intersection between heart disease and cancer.
- To gain an understanding about how common cancer therapies can affect the heart.
- To learn about strategies we use to screen and detect heart disease.
- To learn about strategies to improve heart health.
- To gain insights into our current clinical research.

Who Should Attend

This symposium is designed for patients, their families, caregivers, cardiologists, oncologists, and all healthcare professionals supporting those whose cancer treatment has affected their heart. Additionally, advocates and members of the public who may benefit from understanding cardiovascular care after cancer treatment are invited.

It is expected that 150 will attend.
