

COVID PULSE PROGRAM

STEPS TO TAKE BEFORE YOU LEAVE THE ER:

1

Please make sure you respond to the text message from “COVID Pulse.” This text will come from **215.774.6975**.

2

Please make sure you know what your **oxygen level (%SpO₂)** is before you leave the ER (please ask your provider).

3

Please make sure you receive a Pulse Oximeter device to measure your oxygen level.

WHY WERE YOU ENROLLED IN THE COVID PULSE PROGRAM?

During your ER visit, your oxygen levels were lower than expected. While you are still safe to go home, your doctor would like to monitor your oxygen levels at home with a **pulse oximeter device**, also known as a “**pulse ox**”.

This device will measure your oxygen level to help us know how much oxygen is in your blood.
