## HAMILTON-T1 ventilation modes from A to Z

ASV	Adaptive Support Ventilation. Guaranteed minute volume and respiratory rate (based on user settings and application of lung-protective rules)
APRV	Airway pressure release ventilation
APVcmv	Adaptive pressure ventilation + controlled mandatory ventilation
APVsimev	Adaptive pressure ventilation + synchronized intermittent mandatory ventilation
DuoPAP	Dual positive airway pressure (biphasic positive airway pressure)
nCPAP-PS	Synchronized nasal CPAP for infants/neonates (optional)
NIV	Noninvasive ventilation with bidirectional backup
NIV-ST	Noninvasive ventilation with mandatory rate
P-CMV	Pressure-controlled mandatory ventilation
P-SIMV	Pressure-controlled synchronized intermittent mandatory ventilation
SPONT	Pressure-support ventilation with bidirectional backup
VS	Volume support
