

Navigating to the e-Health Playground

The Playground environment allows staff to practice using e-Health without using real patient charts. This environment refreshes overnight so documentation recorded today will be “erased” the following day.

Follow these steps to find your way to the e-Health Playground environment.

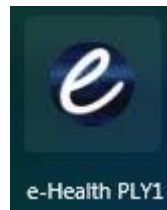

1. In your taskbar on the left click the triangle

2. Double click the Citrix Icon

3. Select e-Health PLY1

4. Select a role from the table below and use the associated User ID and password “train” to log in.

5. Many patients can be found on 8-North and most departments at WBH.

IMPORTANT

**DO NOT use patients with last names beginning with “ZZ”
they will not function properly.**
