

STATUS	LOCATION	PROCESS	ISOLATION PRECAUTIONS	PERSONAL PROTECTIVE EQUIPMENT (PPE)	ROOM PLACEMENT
Screening Determining if patient has potential for COVID-19 infection	ED/ Ambulatory	If BPA does not alert, routine care and monitoring	If BPA does not fire: STANDARD PRECAUTIONS + universal mask + universal eye protection	Patient: Face covering HCW: surgical mask per universal mask policy	Routine patient placement
		If BPA fires, consider this "patient under investigation"	If BPA fires: DROPLET + CONTACT w/ eye protection		Prompt movement of patient out of waiting room and into exam room with closed door
Under Investigation Evaluating if patient requires COVID-19 testing and test type based on clinical presentation	Ambulatory	<ul style="list-style-type: none"> Determine if patient meets testing criteria Decision to treat or postpone visit If symptoms warrant, refer to outpatient testing site <ul style="list-style-type: none"> Enter "COVID-19 Rule Out" Flag in Penn Chart Essential personnel and equipment only 	DROPLET + CONTACT w/ eye protection	Patient: Face covering for duration of visit as tolerated. HCW: Surgical mask, eye protection, gloves, reusable or disposable gowns	Exam room w/ door closed
	ED	<ul style="list-style-type: none"> Provider: evaluate patient <ul style="list-style-type: none"> S/sx of COVID-19 or high-risk group → order rapid test* Post appropriate isolation sign Enter "COVID-19 Rule Out" flag in Penn Chart 	DROPLET + CONTACT w/eye protection CONTACT + AIRBORNE if performing aerosol-generating procedures (AGPs)*	Routine Care: Surgical mask, eye protection, gloves, reusable gowns For AGPs: PAPR or N95 respirator, eye protection + gloves, reusable or disposable gowns	Private room (Consider Airborne Isolation/Negative Pressure Room, if available)
		<ul style="list-style-type: none"> Provider: evaluate patient <ul style="list-style-type: none"> No clinical suspicion for COVID-19 → order routine test* Do not place "COVID-19 Rule Out" flag in Penn Chart Patient may go to a non-COVID unit 	DROPLET + CONTACT w/ eye protection	HCW: Surgical mask, eye protection, gloves, reusable or disposable gowns	Private room
	Inpatient ICU / floor	<ul style="list-style-type: none"> Follow entity specific testing guidelines for type of COVID-19 test to order 	DROPLET + CONTACT w/eye protection CONTACT + AIRBORNE if clinical suspicion of COVID-19 and performing AGPs*	Routine Care: Surgical mask, eye protection, gloves, reusable gowns For AGPs when there is clinical suspicion: PAPR or N95 respirator, eye protection + gloves, reusable or disposable gowns	Private room (Consider Airborne Isolation/Negative Pressure Room, if available)
COVID-19 Positive** Test results positive	Inpatient ICU / Floor	<ul style="list-style-type: none"> Enter "COVID-19 Confirmed" flag in Penn Chart Alert EVS of COVID-19 room Obtain PAPR, N95 (if needed for patient receiving AGP) 	Default: DROPLET + CONTACT w/ eye protection Upgrade: CONTACT + AIRBORNE Based on anticipated need for AGPs	HCW: For routine care → Surgical mask, eye protection, gloves, reusable or disposable gowns HCW: For care with risk of aerosolization → N95 with eye protection or PAPR, + gloves, reusable or disposable gowns	Private room (Airborne Isolation/Negative Pressure Room, if available)

*Performing nasopharyngeal swab for collection of SARS-CoV-2 testing is not considered an AGP and does not require N95/Airborne Isolation/Negative Pressure

** Exclusion: positive results after discontinuation of isolation at 10 or 20 days from symptom onset/ initial positive test
